SUMMARY

Data Engineering-focused MIS senior at SJSU (3.8 GPA, Dean's Scholar) with hands-on ETL pipeline experience in Python, Airflow, and Docker across 278K+ records. Seeking a Summer 2027 Data Engineering internship.

EDUCATION

San José State University

B.S. in Business Administration (Management Information Systems)

GPA: 3.8/4.0 — Dean's Scholar

Relevant Coursework: Database Management Systems, Python Programming, Networking & Data Communications, Agentic AI

San Jose, CA

Expected Dec 2027

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: ETL, Data Pipelines, Workflow Orchestration, Data Modeling, Data Quality, API Integration

Databases: PostgreSQL, MySQL

AI & Machine Learning: LLMs, Prompt Engineering, Scikit-learn, AI Agent Design

Libraries & Tools: Pandas, Apache Airflow, Docker, Git/GitHub, Power BI, Tableau, Excel

PROJECTS

Music Insights Agent

Aug 2026 – Present

Python, PostgreSQL, SQL, Pandas, Docker, ETL | [GitHub](#)

- Built an end-to-end data pipeline processing **278K+** Apple Music activity records, ingesting 10K-row Pandas chunks into Parquet before loading to PostgreSQL.
- Cleaned **172K+** PLAY_END events by removing duplicate IDs and flagging invalid durations. Loaded **160K+** validated records into PostgreSQL using staging-table UPSERT.
- Added post-load SQL data-quality checks for missing song names and durations, duration-quality mix, and event timestamp ranges.
- Built **4** PostgreSQL analytics views to analyze listening trends, tracks, and devices. Also designed a read-only LLM text-to-SQL agent.

Soccer Data Pipeline

May 2026 – Aug 2026

Python, MySQL, Pandas, Apache Airflow, Docker, API-FOOTBALL | [GitHub](#)

- Built a Dockerized ETL pipeline ingesting **380** Premier League matches plus team and venue data from API-FOOTBALL into MySQL using UPSERT loads.
- Orchestrated four ETL tasks in Apache Airflow with dependencies, retries, and logging.
- Created MySQL tables with primary keys and foreign keys to organize match, team, and venue data.

LEADERSHIP EXPERIENCE

Technical Workshops Lead — Spartan Analytics, SJSU

Aug 2026 – Present

- Lead weekly **Python, SQL, and data analytics workshops** for **20+ SJSU students** through hands-on projects.
- Plan workshop content and mentor students through coding exercises using VS Code, GitHub, and data visualization tools.

EXPERIENCE

Operations Manager — Umah Service LLC

June 2026 – Present

San Jose, CA

- Made daily dispatch decisions for **20+ contractors** using scheduling and transportation data, balancing driver availability, trip demand, and service needs.
- Presented scheduling performance and operational issues to business stakeholders in weekly reviews, aligning priorities and resolving problems before they affected service.
- Identified scheduling bottlenecks and workflow inefficiencies using operational data, partnering with leadership to improve dispatch planning and processes.

GSOC Security Specialist — Securitas Technology

May 2025 – Present

LinkedIn Headquarters, San Jose, CA

- Monitored real-time security data across multiple systems, tracking incident trends and documenting alerts to support risk assessment and emergency response.

CERTIFICATION

Google Data Analytics Professional Certificate — Google/Coursera, Aug 2025. Skills: SQL, Tableau, R, spreadsheets, data cleaning, analysis, and visualization. Credential: coursera.org/verify/professional-cert/SEN3EZJEPCLN
