San Jose, CA | Mohamedibrahim.sjsu@gmail.com | (408) 618-9877 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

EDUCATION

San José State University

San Jose, CA

B.S. in Business Administration (Management Information Systems)

Expected Dec 2027

SJSU GPA: 3.8/4.0 | Dean's Scholar

Relevant Coursework: Agentic AI, Database Management Systems, Python Programming, Networking & Data Communications

TECHNICAL SKILLS

Languages: Python, SQL

Databases: PostgreSQL, MySQL

Data Engineering: ETL, Data Pipelines, Workflow Orchestration, Data Modeling, API Integration, Data Quality

Tools: Apache Airflow, Docker, Git, GitHub, Power BI, Tableau, Excel

PROJECTS

Music Insights Agent

Aug 2026 – Present

Python, PostgreSQL, SQL, Pandas, Docker, ETL | [GitHub](#)

- Built an **end-to-end data pipeline** processing **278K+ Apple Music activity records**, creating a reliable foundation for **downstream analytics**.
- Developed a **Python ETL pipeline** that cleaned and validated **172K+ PLAY_END events**, loading **160K+ verified records** into **PostgreSQL** to improve **data quality and consistency**.
- Designed **PostgreSQL analytics views** and an **LLM-powered text-to-SQL agent**, enabling fast, repeatable **natural-language analysis** without manual SQL queries.

Soccer Data Pipeline

May 2026 – Aug 2026

Python, MySQL, Pandas, Apache Airflow, Docker, API-FOOTBALL | [GitHub](#)

- Built a **Dockerized ETL pipeline** that ingested **380 Premier League matches**, team, and venue data from **API-FOOTBALL** into **MySQL** for downstream querying and reporting.
- Orchestrated **four ETL tasks with Apache Airflow**, using dependencies, retries, and logging to make pipeline failures easier to track and rerun.
- Designed **MySQL relational tables** with **primary-key validation and UPSERT logic**, preventing duplicate records and keeping data consistent across repeated pipeline runs.

LEADERSHIP EXPERIENCE

Technical Workshops Lead | Spartan Analytics, SJSU

Aug 2026 – Present

- Lead weekly **Python, SQL, and data analytics workshops** for **20+ SJSU students** using hands-on projects.
- Plan workshop content and mentor students through coding exercises using **VS Code, GitHub, and data visualization tools**.

EXPERIENCE

Operations Manager

June 2026 – Present

Umah Service LLC

San Jose, CA

- Made daily dispatch decisions for **20+ contractors** using scheduling and transportation data, balancing driver availability, trip demand, and service needs to keep operations running smoothly.
- Presented scheduling performance and operational issues to **business stakeholders in weekly reviews**, helping align priorities and resolve problems before they affected service.
- Identified scheduling bottlenecks and workflow inefficiencies using operational data, partnering with leadership to improve **dispatch planning and operational processes**.

GSOC Security Specialist

May 2025 – Present

Securitas Technology

LinkedIn Headquarters, San Jose, CA

- Monitored and analyzed **real-time security data across multiple systems**, identifying incident trends and supporting risk assessment and reporting.
- Tracked and documented **security incidents, alerts, and response data** to support operational decisions and emergency response procedures.

CERTIFICATION

Google Data Analytics Professional Certificate — Google/Coursera, Aug 2025. Skills: SQL, Tableau, R, spreadsheets, data cleaning, analysis, and visualization.

Credential: coursera.org/verify/professional-cert/SEN3EZJEPCLN
